[RP-8] Rokit Powered 8 Powered Reference Studio Monitor

ROKIT Powered Monitors feature several of the key design elements found in KRK's premium models, many of which have become the "studio standard" for the world's finest engineers, producers and musicians. Now, you can have that same KRK sound, attention to detail and commitment at a price that makes Rokit Powered a truly uncommon value.

All KRK Rokit Powered Series monitors feature a proprietary signature yellow woofer made of a woven glass aramid composite that delivers a tight low-end response and a soft dome tweeter for natural sounding highs. The drivers are electronically crossed over and are bi-amped for increased efficiency. All of this is housed in an attractive cabinet with radiused corners that reduce edge diffraction resulting in better audio imaging. The rear input panel features phone plug and XLR connectors to accommodate any application.
